Entrac Technologies Adopts SharePoint 2007 as its Enterprise Portal

Entrac Technologies Adopts SharePoint 2007 as its Enterprise Portal

Toronto, Ontario, Canada – January 15, 2008 – SharePointHQ®, a leading provider of training, professional services, hosting, web parts and solutions for Microsoft® SharePoint® Products and Technologies, announced today that it has implemented Microsoft Office SharePoint Server 2007(MOSS 2007) for Entrac Technologies.

After evaluating several potential vendors within the Toronto IT marketplace, Entrac chose SharePointHQ to perform the implementation of SharePoint 2007 as its corporate Intranet. The SharePoint 2007 based corporate portal was fully configured to take advantage of SharePoint 2007's Collaboration feature group. The SharePoint 2007 portal delivers to Entrac a secure, centralized portal, with advanced document collaboration features, accessible to Entrac end users through a single point of access. Collaboration among Entrac's end users, teams and departments is further enhanced by SharePoint 2007's Web 2.0 functionality. Access to Excel 2007 spreadsheets stored within Entrac's Intranet was enabled through SharePoint 2007's Excel Services.

“The Jumpstart program was a great way to focus our efforts and achieve our goals. It allowed for a seamless transition to SharePoint 2007, while building a foundation for future enhancements,” said Micah Kornberg, President of Entrac Technologies Inc. “Working with SharePointHQ was a pleasure. The program was delivered on-time and on-budget, the staff was professional and insightful, and the trainers were knowledgeable and easily able to tailor the sessions to the participants as needed.”

The SharePoint 2007 implementation was performed by SharePointHQ's Professional Services division. SharePointHQ Professional Services solutions include custom branding, workflows, contract management, departmental solutions and custom development SharePoint portals, and are built upon the SharePointHQ JumpStart Platform. The JumpStart Platform allows companies to rapidly implement Windows SharePoint Services 3.0 or Microsoft Office SharePoint Server 2007 as their collaborative enterprise portal.

For more information on SharePointHQ's solutions, contact Mr. Grant Jurgeneit, Americas Sales Manager, SharePointHQ Professional Services, at 416-585-9678 ext. 284 or Consulting@SharePointHQ.com.
